

Cold Climate Multizone Heat Pumps - December 2021

AHRI: Air Conditioning Heating and Refrigeration Institute

HSPF: The Heating Season Performance Factor (HSPF) describes the heating performance of a heat pump over the heating season. Many manufacturers list the HSPF for Region 4 (IV), which is based on the space heating requirements for the Northern United States, Region 5 (V) has a climate similar to that of New Brunswick.

SEER: The Seasonal Energy Efficiency Ratio (SEER) describes the cooling performance of a heat pump over a cooling season.

Capacity (tons): This is the heat output of the system measured at 8 degrees celsius. 1 ton is equivalent to 12,000 British Thermal Unit per hour (BTU/h) or roughly 3.5 kilowatts (kW).

Énergie NB Power

the power of possibility
débordant d'énergie

Brand	AHRI Certified Reference Number	Outdoor Model	Indoor Model(s)	Capacity (tons) at 8°C	SEER	HSPF (Region 4):	HSPF (Region 5):	Minimum Operating Temperature (C)
